YOUR PARTICIPATION IS CRITICAL! Tires have been banned from landfills for many years. Because of the high disposal costs, tires are thrown in our woodlands, waterways, along roadways, or in illegal stockpiles. Improper disposal can lead to significant environmental problems such as surface and groundwater contamination, fires which release toxic fumes, and the creation of habitats for pests such as rodents and mosquitoes. Proper disposal will reduce or eliminate these problems! Waste tires may be shredded and used in playgrounds, for arena footing, roads, or as tire derived fuel.

Manitowoc County may modify guidelines and prices at any time to meet the needs of the program.
